1000 SEEDLING DONATION FROM DEVA FOR A BETTER RESPIRATION

DEVA has donated 1000 seedlings in cooperation with Aegean Forest Foundation in memory of the 37th National Respiration Congress held by Turkish Respiratory Society (TÜSAD) in Çeşme.

A wood of 2000 seedlings was erected in cooperation with the Aegean Forest Foundation in memory of the 37th National Respiration Congress held by Turkish Respiratory Society (TÜSAD) in Çeşme. DEVA, the well-established domestic pharmaceutical manufacturer of Turkey, donated 1000 seedlings in support of TÜSAD in this project.

DEVA, on one hand, develops treatments for a healthy future and puts the same into the service of medicine and on the other hand, makes projects to create awareness about several issues. DEVA, believing that the forests are the lungs of the earth, has supported TÜSAD in this meaningful project and will keep taking part in such environmental awareness projects.

About DEVA:

DEVA Holding, being active since 1958, is one of the well-established pharmaceutical manufacturers of Turkish healthcare sector. Today, DEVA Holding is among the few pharmaceutical companies carrying its success in the field of medicines for human use to the field of animal health through one of its group companies, Vetaş. DEVA Holding, going beyond the borders of Turkey through its innovative products, has a R&D center equipped with the state-of-the-art technology.
